## DETAILED ACTION

### *Specification*

The specification of the disclosure is objected to because it does not reference figure 40A in the description of the drawings section. Correction is required.

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species:

A: Figures 1,2 4-8	I: Figure 19	Q: Figure 27	Y: Figure 35
B: Figure 12	J: Figure 20	R: Figure 28	Z: Figure 36
C: Figure 13	K: Figure 21	S: Figure 29	AA: Figure 37
D: Figure 14	L: Figure 22	T: Figure 30	AB: Figure 38
E: Figure 15	M: Figure 23	U: Figure 31	AC: Figure 39
F: Figure 16	N: Figure 24	V: Figure 32	AD: Figure 40, 40A
G: Figure 17	O: Figure 25	W: Figure 33	AE: Figure 43
H: Figure 18	P: Figure 26	X: Figure 34	AF: Figures 44-45

Upon election of a species above, the following subspecies drawn to different sterilizer designs is required:

I: Figure 9	III: Figure 11	V: Figure 42
II: Figure 10	IV: Figure 41	

The species are independent or distinct because they are drawn to different protective cover designs and different integrations on the syringe tube body.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
